INNOVATIVE
SLEEPING CULTURE

SINCE 1847

The success story that is BRINKHAUS, a company full of tradition, began in Warendorf, Germany, in 1847. A lot has happened since then. We now face new markets, new requirements and new challenges. But we have dealt with it all in a flexible, innovative way – without compromising our proven BRINKHAUS quality.

BRINKHAUS products are manufactured in accordance with the latest production developments and techniques – and, of course, in accordance with the customer's requirements and wishes. We purchase high-quality materials and fillings from all over the world for use in our products.

Today, the BRINKHAUS brand stands for the very highest quality in over 40 countries around the world.

INNOVATIVE SLEEPING CULTURE

The name BRINKHAUS has been synonymous with expertise and quality in premium bedding since 1847. Our company has always aimed to meet the highest standards in design and sleeping comfort. We develop, manufacture and market premium bedding with tradition, innovation and experience – taking care to respect the natural environment at all times.

With our selected down, the finest natural hair, natural fibres or allergen-free textile fibres, BRINKHAUS provides dreamlike quality for your home for everything from pillows to quilts. Feel for yourself, you are sure to be impressed!

BRINKHAUS branded products are available from prestigious specialist suppliers worldwide. BRINKHAUS offers a complete programme of bedding products: divan beds, mattresses, toppers, quilts, duvets, pillows and mite blockers.

WE UNDERSTAND RESTFUL SLEEP

DOWN AND FEATHERS

These are a true wonder of nature and have been used for hundreds of years as the ideal filling for duvets. With countless tiny air pockets between the individual hairs, they ensure optimal heat insulation and transfer moisture to the surrounding air. The origin of the down is tracked via the BRINKHAUS traceability system. Moreover, the Traumpass seal promises down that does not come from living animals. At BRINKHAUS, the down goes through a fully integrated control process; it is washed, controlled and sorted in a multistage process – for your comfort!

NATURAL HAIR AND FIBRE

Nature can offer everything we need for a recuperative night's sleep: the finest cashmere for a dreamlike lightness, quality wild silk for a balanced sense of well-being at different temperatures, or natural new wool for a cosy sleeping environment.

TEXTILE FIBRE

The high-quality, textile fibre quilts from our TEXTILE FIBRE range combine easy care with outstanding comfort. They lie softly and gently on the body, enabling undisturbed and recuperative sleep and can be quickly washed and dried. They are unaffected by high wash temperatures and tumble-dryers, which makes TEXTILE FIBRE bedding ideal for people suffering from house dust mite allergies.

PRODUCT FEATURES

THE BRINKHAUS PRODUCT HIGHLIGHTS

The high quality of BRINKHAUS quilts, duvets and pillows is based on meticulously selected materials and the latest production methods. We apply a high degree of manufacturing know-how into our production facilities. As a specialist for fillings destined for quilts, duvets and pillows, we offer top-class sleeping comfort.

THE TAILOR-MADE CORNER

Hand-sewn corners offer the following benefits: perfect fit, no slipping, no empty bedding corners, making bedmaking easier and faster.

THE SHOULDER ZONE

Perfect mouldability in the shoulder area.

THE STITCHING IN BODY ZONES

Replicating the body's shape to create a bed cocoon for constant heat retention.

THE FOOT ZONE

Perfect mouldability in the foot area.

THE STITCHING IN BODY ZONES

Moulding to the shape of the sleeper, the duvet's body zone stitching creates a cocoon providing a pleasant sleeping climate and the highest comfort. The stitching follows the contours of the body thus making a perfect sleeping cocoon with constant heat retention. It gently covers the body of the sleeper as lightly as a feather and provides optimal heat distribution, especially in the shoulder and feet regions, for superior comfort.

Duvets with body zone stitching offer great and recuperative sleep. It provides a pleasant, dry sleeping climate with good heat retention. Body zone stitching offers unparalleled cosiness and the first-rate materials guarantee exceptional sleeping comfort.

THE DUAL CONSTRUCTION

Lightweight, pleasantly warm and cosy sleeping – the dual construction comprises two individual quilts, one on top of the other, firmly sewn together along the edges. This results in an insulating air cavity between the two quilts, providing better heat retention without adding weight. The air cushion in the quilts improves sleeping ambience without burdening the sleeping body. The dual construction is a perfect example of modern and light-weight bedding that, in spite of the low weight, provides a heat-retaining air cushion for constant and pleasant warmth and cosy sleeping comfort.

The dual construction

THE BRINKHAUS PRESS STUDS AND BUTTONS

The sturdy BRINKHAUS press studs and buttons provide an easy combination option for all seasons and individual sleeping preferences. Our mother-of-pearl studs help adapt to different levels of ambient temperature. A light version can be used individually as a summer duvet while the thicker version is suitable for the spring or autumn. Connect both duvets for perfect warmth in winter.

Neatly combined - with our press studs and buttons

DOWN AND FEATHERS

*...envelop you softly and gently because we only
select the best down for our products. Especially cosy,
it has heat-insulating and temperature-regulating
effects unlike hardly any other material.*

Perfect for high standards – and for you!

Re.

THE EIDER

THE EIDERDOWN DUVET

Nature has created an incredible and unique insulation material in the form of Icelandic eiderdown. Eiderdown is very large but finer and denser than any other type of down. It forms a sort of fleece that insulates like no other natural or artificial material. The eider ducks brave icy temperatures and powerful polar storms in their plumage. They use their unique breast and stomach down to protect their brood from the cold Icelandic climate. The females naturally lose part of their down before laying their eggs and carefully collect this to fill their nest. Once the chicks hatch and leave their nest, the eider duck farmers then carefully collect the precious down without disturbing the birds in their natural environment. This down is then used in the uniquely cosy LUXURY LIFESTYLE collection.

Cover fabric

Due to the special properties of eiderdown, we do not use conventional cover fabrics that may prevent the cosy down from escaping. Eiderdown can be held by fine, natural silk fabrics. This also promotes the exchange of heat and breathability of eiderdown duvets.

Design

To ensure the filling is distributed perfectly, we first weigh the filling for each square and painstakingly fill each pocket of our eiderdown duvets by hand.

Specifications

ARCTIC

THE DOWN DUVET AND PILLOW

These new BRINKHAUS LUXURY LIFESTYLE duvets and pillows combine the traditional value of first-class down duvets with modern technology. The fabric consists of the finest silk and Tencel® (lyocell). Lyocell shares many properties with other cellulosic fibres such as cotton and linen. Some of the main characteristics of lyocell fibres are that they are soft, absorbent and very strong when wet or dry, and resistant to wrinkles. Silk is a traditional material for luxurious fabrics: the flat surfaces of the fibrils reflect light at many angles, giving the fabric a natural shine. Silk has a smooth, soft texture that is not slippery. Both materials combined in a finest satin fabric result in a very soft, very shiny and luxurious fabric. The filling is a high-grade down from a grey duck: the down cluster is very soft and very large, with a very high fill power and high thermal insulation.

CHARME

THE DOWN DUVET

The elegant down duvets of the CHARME series combine in the most charming fashion one of the world's finest batiste fabrics with a goose down filling of the highest possible grade. The silver down of the Canadian wild goose is among the best available in the high-quality, natural filling materials industry. The size and highly ramified make-up of the individual three-dimensional down by far exceed even the best down from purpose-bred geese down with regard to their filling ability. Their unique insulation properties protect this animal – from the harsh Canadian regions and severe weather with snow and ice. We combined this unique filling material with an ultra-fine cotton-batiste fabric which envelops the prized and exquisite filling to create its superb drape.

Specifications

CHALET

THE DOWN DUVET

Imagine a breathtaking, timeless world which combines a sense of peace and comfort with striking natural beauty. These are surroundings in which you feel completely at home. Our high-quality CHALET duvets and pillows combine tradition and innovation. The remarkable combination of materials used for the casing and filling creates a product that is both lightweight and soft, ensuring perfect sleeping comfort all year round. An ultra-light nano-batiste, made from 100 % cotton is used for the casing, while the specially selected filling is created by using white large cluster goose down. CHALET duvets are available in light, medium and warm versions. Press studs on the individual covers allow you to combine the duvets any way you like. Perfect sleeping comfort throughout the seasons. The CHALET pillows on the following page make the perfect sleep setting complete.

CHALET

THE DOWN PILLOW

Perfect sleeping comfort throughout the seasons is complemented by our CHALET pillow programme. These pillows offer an incomparably restful sleep. The voluminous down filling supports head and neck, the ultra-fine shell fabric has a very luxurious touch.

The side sleeper pillows are natural, beautiful, soft and luxurious pillows with an outer baffle edge that is designed to allow the mature full-sized goose down filling to give loft and support to the outermost edge of the pillow. This allows the head to rest in the centre of the pillow whilst the baffle edge nestles against the neck and shoulder for excellent comfort, especially for those who prefer to sleep on their side.

The CHALET pillow – a wonderfully soft down pillow to snuggle up to and feel good. Absolute luxury quality, comes from a real passion for excellence. At BRINKHAUS, we have that passion and take pride in constantly striving for new and even higher peaks of perfection and achievement.

The neck support pillow offers extra comfort: The pillow is designed in a similar way to a three-chamber pillow. The outer chambers are filled with high-quality down which gives the pillow its remarkable softness. The centre of the pillow consists of an ergonomically-shaped core of viscoelastic foam that supports your head and neck in a manner perfectly tailored to your anatomy and, in contrast to other conventional neck support pillows, can be used on both sides. The special comfort advantage: The pillow effectively provides support while remaining cosy so that you can sleep in comfort.

FINESSE

THE DOWN DUVET

Absolute luxury, synonymous with the pinnacle of quality, comes from a real passion to create the highest possible levels of excellence in products. At Brinkhaus, we have that passion and take pride in constantly striving for new, even higher, peaks of perfection and achievement. The FINESSE has evolved from this passion. It has long been appreciated that the highest fill power and the lightest down for filling comes from mature, fully-grown free-range geese. This gives minimum interference whilst we turn during our sleep. Through a selected base of suppliers, we at Brinkhaus have developed a new Siberian white goose down that achieves the ultimate levels of down purity, highest fill power and supreme lightness. We put this exceptional new white goose down in soft, silk-like, cotton sateen cases for a sumptuous and truly luxurious product.

Specifications

SILHOUETTE

THE DOWN DUVET

A qualitatively high-end filling made from white Masurian goose down and a luxurious covering made from the finest maco batiste ensure that this superb down duvet results in a sleep experience of the highest class. This well-balanced interaction allows you to enjoy a trouble-free sleep. The down characteristically surrounds itself with a layer of air, creating an additional cushioning effect and offering cosy warmth without weight. The soft-to-the-touch body zone quilting and the perfect make-up of the corners complete the luxurious SILHOUETTE down duvet to provide the ultimate in sleep comfort.

The body zone stitching

Thanks to the body zone stitching, the duvet drapes ideally around the body thus forming a cocoon with a pleasant sleeping climate and the highest comfort. The stitching follows the body's contours thus making a cocoon with constant heat retention. Ideal warmth distribution is assured – especially around the shoulders and feet. A quilted edging rim closes the duvet from the ambient air. Duvets with body zone stitching and a quilted edging rim assure great and recuperative sleep as well as a pleasantly dry sleeping climate with great heat retention. Body zone stitching offers unparalleled cosiness and the first-rate materials guarantee exceptional sleeping comfort.

DOWN AROUND

THE DOWN PILLOW

A pillow with a touch of luxury. The peripheral outer baffle gives the pillow an elegant shape and also provides excellent support and loft. An ideal pillow for people who love the luxury of a soft down filling but do not wish to dispense with support. The pillow has a feather core, providing support and volume. The two outside chambers are filled with 90 % down, making them particularly cosy.

KONYA

THE NATURAL QUILT

The KONYA quilt is the choice of the connoisseur. It conjures up the very essence of the Orient, lavish opulence, comfort and pure luxury, all in amazing silk. At BRINKHAUS, we use only luxury Tussah wild silk which means that the silk is gathered after the silk worm has pupated and the moth gone from the cocoon. Pure silk is an ideal natural filling for medium and summer weight quilts because it is relatively light, lofty and cool, yet it is inherently body responsive and holds heat as needed.

Specifications

Casing	finest satin, 100 % silk, TC 434
Filling	100 % pure finest silk
Design	opposing waves with outer rim
Colour	cream

Product	Product Code	Size in cm	Filling Weight

PASHMINA

THE NATURAL QUILT

Combining lightness and warmth with luxurious drape, this is the ultimate alternative filling for those who do not want synthetics or down. Using the down equivalent, i.e. the soft fine undercoat hair of the cashmere goat, we have created a highly absorbent luxurious filling offering outstanding heat retention and exceptional comfort.

Specifications

Casing	ultra-fine satin in 100 % Egyptian long staple cotton, medicott® treated, TC 485
Filling	100 % pure cashmere

COCOON

THE TEXTILE FIBRE QUILT

This high-quality, light filling made of the ultra-fine AIR-FILL® functional fibre is extremely breathable and moisture-regulating resulting in a dry and warm sleeping climate. The functional fibre has been refined to create numerous tiny air pockets rather like down. AIR-FILL® functional fibre has high insulation properties facilitating the light fill weight of the duvet and similar to that of modern ski jackets.

The body zone stitching

Thanks to the body zone stitching, the duvet drapes ideally around the body thus forming a cocoon with a pleasant sleeping climate and the highest comfort. The stitching follows the body's contours thus making a cocoon with constant heat retention. Ideal warmth distribution is assured - especially around the shoulders and feet. A quilted edging rim closes the duvet from the ambient air. Duvets with body zone stitching and a quilted edging rim assure great and recuperative sleep as well as a pleasantly dry sleeping climate with great heat retention. Body zone stitching offers unparalleled cosiness and the first-rate materials guarantee exceptional sleeping comfort.

Specifications

Casing finest satin in 54 % micro-Tencel® / 40 % cotton / 6 % silk, TC 362
 Filling AIR-FILL® (100 % polyester)
 Colour white

Brinkhaus
The Best of the Best

CERTIFICATES

THE COMMITMENT

The quality offered by the BRINKHAUS brand is based on carefully chosen materials combined with modern production methods. Our range of quilts and pillows stands for first-class sound sleep.

Our guarantee label underlines the high quality of our BRINKHAUS brand products by describing the components they are made of and the benefits they offer. Every filling boasts 100 % BRINKHAUS quality. This is our guarantee that our products will meet even the most stringent of quality requirements.

SEALS OF QUALITY

ÖKO-TEX

Product identification with the label "Confidence in Textiles" and the connected proven safety of textile products is an additional sales argument which surveys have found to be more important to consumers than price, functionality or brand. Widespread use and customer awareness of the OEKO-TEX® Standard 100 contribute to the OEKO-TEX® label now having a status similar to that of a brand name and being actively requested by consumers. Marking products with the OEKO-TEX® label therefore provides all textile and clothing manufacturers with valid certificates with an effective way of drawing more attention to their products. Without visible labels, consumers are not in a position to assess the human ecological quality of the textiles.

MEDICOTT®

The spores of mould and mildew are known to be a cause of allergies. Their damaging influence can be combated with a special process technology. We have therefore treated the cloth for our quilts and pillows using the Medicott® process. When the products are cleaned correctly, this process inhibits the growth and development of mould and mildew – even when the product is wet for some time. The process does not use fungicides, microbicides or bactericides. It preserves the cotton fibre and supports its durability.

NOMITE®

The NOMITE® mark indicates that a product is suitable for house dust mite allergy sufferers: because down- and feather-filled products offer excellent thermal and climatic conditions for humans (rapid warming up when one is sleeping, rapid decrease in humidity when the bedding is aired), they provide a very poor habitat for house dust mites, which rely on high humidity to live. The tight weave of the down- and featherproof fabric acts as a barrier, preventing the mites from passing through, and therefore offers additional protection - so that those who suffer from house dust allergies or asthma can also enjoy the natural comfort afforded by down and feather bedding. This has been demonstrated by scientific research.

TRAUMPASS

Traumpass is a quality seal used for bedding, sleeping bags and clothing that are filled with down and feathers. Products marked with this seal must be filled with down and feathers from the two highest classes I and II in accordance with EN 12934. In addition, all raw materials used in Traumpass products are by-products from meat production and thus sourced exclusively from slaughtered animals. Companies who use the seal on their products have agreed to adhere to this specification. The label "Traumpass DIN tested", which is sewn into every product, contains an individual lot-specific testing number that enables the manufacturing company to be identified. The origin of the down and feathers used for filling can be traced back via documents such as delivery notes, invoices, tax and import certificates, ending at the slaughterhouse from which the raw materials are sourced. This guarantees that products with the Traumpass seal do not contain material from living animals. Checks to ensure that the user of the seal follows these guidelines are carried out in regular audits of the companies by the certification organisation DIN CERTCO, Berlin.
